

Proven, simple system bridges the distance in healthcare.

RemetricHealth provides **physician groups, hospitals, home health agencies, and payers** with remote, real-time biometric monitoring and management tools and telehealth services to assess patients remotely between visits. Our solutions help improve outcomes and reduce acute events, emergency department visits, and hospital readmissions.

We offer several types of RPM kits, which providers own and patients use at no charge to them. Choose the option that's right for your practice.

Simple Solutions

RemetricHealth's clients benefit from simple devices and easy interfaces to interact remotely with patients, monitor their health, and ensure continuity of care.

- Real-time patient biometric data
- Hassle-free video telehealth
- Automatic RPM/CCM time & activity tracking
- Patient compliance & engagement tools
- Symptom management

Plug and Play *for patients*

All-inclusive kits require no technology expertise for patients to use them quickly and effectively.

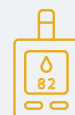

RemetricHealth's
